

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SCIENCE

FRIDAY, JANUARY 5, 1912

CONTENTS

The American Association for the Advancement of Science:—

<i>The Washington Meeting:</i> PROFESSOR JOHN ZELENY	1
<i>The Work of the Electrical Division of the Bureau of Standards:</i> DR. EDWARD B. ROSA	8
<i>Progress in Industrial Fellowships:</i> PROFESSOR ROBERT KENNEDY DUNCAN	19
<i>University Registration Statistics:</i> PROFESSOR RUDOLF TOMBO, JR.	21
<i>Scientific Notes and News</i>	22
<i>University and Educational News</i>	26

Discussion and Correspondence:—

"Genotypes," "Biotypes," "Pure Lines" and "Clones": DR. GEORGE H. SHULL. *The*

History of Mathematics in the Recent Edition of the Encyclopædia Britannica: PROFESSOR L. C. KARPINSKI. *Devastation of Forests in the White Mountains:* DR. FRANK W. VERY

27

Scientific Books:—

Hobbs's Characteristics of Existing Glaciers: PROFESSOR HARRY FIELDING REID. *Linck's Fortschritte der Mineralogie, Kristallographie und Petrographie:* PROFESSOR C. PALACHE. *Hancock's Nature Sketches in Temperate America:* PROFESSOR A. S. PEARSE

35

Special Articles:—

On Powers of Ten: DR. W. P. WHITE ...

38

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

THE WASHINGTON MEETING

THE sixty-third meeting of the American Association for the Advancement of Science was held at Washington, D. C., December 27 to December 30, 1911, under the presidency of Dr. Charles E. Bessey, of the University of Nebraska. The meeting was the most successful in the history of the association, both from the point of attendance and from the enthusiasm shown. Beautiful weather prevailed throughout and the people of Washington, including the many scientific men connected with the various governmental bureaus, did everything in their power to make the stay of the visitors pleasant and profitable. The total registration of members of the association was 1,306, whereas the largest previous registration was that at the third Boston meeting, when the total was 1,140. A conservative estimate of the actual number of members of the association present in Washington would place the number at 1,800 and there were doubtless as many as a thousand more present who are members of affiliated societies and not members of the association itself. The following is a list of affiliated and other scientific societies which met in Washington at the same time.

Astronomical and Astrophysical Society of America.
American Physical Society.
American Society of Biological Chemists.
American Chemical Society.
Association of American Geographers.

Geological Society of America.
Paleontological Society of America.
American Association of Economic Entomologists.
Entomological Society of America.
American Breeders' Association.
